

I felt relief and recovered agility from my rheumatoid arthritis after a few days of taking 6 capsules per day. I will continue using StemEnhance to stay active, fit and physically independent despite aging.

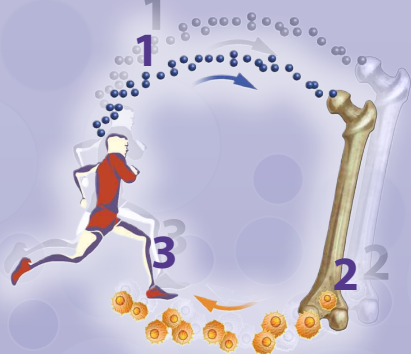

- Angelina Silli, Q.C.

Your body's **renewal** system

Your body's renewal system depends on the release of adult stem cells into your bloodstream.

Your own adult stem cells have the power to maintain and repair tissue cells as needed – a vital, life-sustaining process that helps to maintain your health and well-being. However, factors such as daily exposure to environmental toxins, physical and mental stress, poor diet and the aging process may cause a decline in your body's ability to renew itself, putting your wellness at stake. SE2® supports the natural release of your adult stem cells from the bone marrow.

The Incredible Power of Adult Stem Cells at Work

1. "Messengers" are sent by tissues in need, requesting the **release** of adult stem cells from the bone marrow.
2. Adult stem cells then **circulate** in the bloodstream.
3. A different set of "messengers" attract adult stem cells to **migrate** into tissues where the stem cells reproduce and become new healthy cells of that tissue.

From Stemtech **The Stem Cell Nutrition** Company™

Stemtech is a Science-based company with patented and patent-pending products, along with published scientific studies.

Stemtech nutritional products support the release, circulation and migration of stem cells to tissues and organs - including the skin.

INNER Wellness

PROLIFERATE

OUTER Vibrance

DermaStem® Renewal Serum supports the proliferation of skin stem cells to revitalize and renew the skin.

Stemtech products are not sold in stores.

**Supports
the Release of
Millions
of Adult Stem Cells**

RELEASE

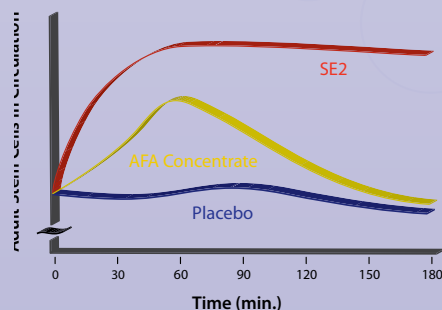

SE2 **supports** the body's essential renewal process

with the release of **millions** of adult stem cells into your bloodstream – for a **longer period of time**

Stemtech was the first to discover the way to support the body's natural renewal system by releasing more adult stem cells into the bloodstream. Our latest discovery lasts for hours, helping the body maintain and repair healthy tissue and organs.

Tests show SE2 supports **long lasting** release of more adult stem cells

In a double-blind crossover study, our SE2 StemRelease™ Proprietary Blend showed superior results.

Adult Stem Cells...Your **Key** to **Optimal** Health

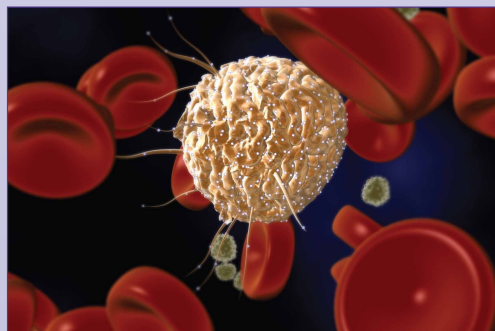

1. Embryonic Stem Cells

These are extracted from 8-10 day old embryos - that's why there's so much controversy surrounding their research and use.

2. Adult Stem Cells

These are present in your body from the day you are born and are naturally produced in your marrow.

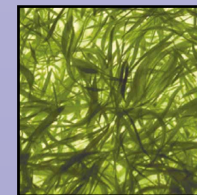

“Results of many scientific studies indicate that increasing the number of circulating adult stem cells is probably the single most important thing you can do to maintain optimal health.”

Recent research has found that they are the core of your body's natural renewal system.

A patent-pending, proprietary blend of **extraordinary, all-natural** ingredients starting with **AFA Concentrate**

SE2 Advanced Formula contains StemRelease Complex, which includes our patented concentrate of Aphanizomenon flosaquae (AFA Concentrate). PLUS three ingredients now discovered to work in partnership with AFA Concentrate to support a more significant increase in the release of adult stem cells.

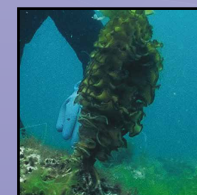

Aphanizomenon flos-aquae (AFA Concentrate)

is documented in published studies to support the natural release of adult stem cells from bone marrow.

Polygonum multiflorum

is an herb with a long history of use to support health and rejuvenation. An extract of Polygonum multiflorum was recently documented to support the release of stem cells from the bone marrow.

Cordyceps sinensis

is a synergistic ingredient that has been associated with stamina and longevity, and a wide variety of health benefits. When used with AFA Concentrate, fucoidan from Undaria pinnatifida and Polygonum multiflorum extract, this combination enhances the support of stem cell release.

Undaria pinnatifida

is a marine alga from pristine ocean environments around the world well known to support the immune system. Fucoidan from Undaria Pinnatifida has been documented to support a long-lasting increase in the number of circulating stem cells.
